Workshop: "A safer space for children"

In the framework of "A safer cyber space for children", NAECCS in cooperation with the State Agency for the Rights and Protection of Children (ASHMDF), organized a Workshop on March 27, 2024 at the Kukës Palace of Culture.

This workshop was developed in the framework of raising awareness among children and young people about a safer cyberspace, bringing to attention the positive contributions that the development of technology has, however, it can present many risks that they may face in cases of inappropriate use of digital space.

Children and parents should know that for any concerns encountered in various forms such as: psychological violence, abuse, neglect, etc., they can report to the official website of NAECCS on the RAPORTO platform, or they can notify the ASHMDF and the line helpers for children, Alo 116 111. Participants in this Workshop were representatives from the local government, law enforcement institutions, social workers, children of different age groups from 9-year-old and secondary schools, teachers, parents as well as representatives of non-governmental organizations that play an important role for the protection of children.

NAECCS training for increasing the capacities of critical and important infrastructures

ANAECSS, maximally engaged in increasing the capacities of the staff of critical and important information infrastructures on March 27-28, organized for this purpose the two-day training with the Transport, Energy, Water and Waste Sectors.

The main focus was the recognition and awareness of IT/CT personnel in the field of cyber security, their training in responding to cyber incidents as well as their preparation in identifying threats through Cyber Drill (CD) - Real simulations of cyber security incidents.

Alert: A new phishing attack appears

A new phishing campaign has recently been discovered, which uses a new malware, called Agent Tesla, dedicated to information extraction.

Security researchers have identified a phishing email whose message takes the form of a bank payment notification, asking the user to urgently open an archived file attached to the email. The archived file contains malicious content that activates the procedure for sending the Tesla Agent program to the user's computer.

A new phishing scam targets Microsoft 365 and Gmail accounts

Cyber attackers are increasingly using a new Phishing as a Service (PhaaS) platform, called 'Tycoon 2FA', to launch attacks on Microsoft 365 and Gmail accounts, bypassing multi-factor authentication protections that they have.

Tycoon 2FA has released a new, more efficient version of the platform, indicating that there is an ongoing attack effort. The service is currently used by over 1,100 domains and has been seen active in over a thousand phishing attacks.

Tech trade union - data breach

The tech trade union, which represents hundreds of thousands of workers in sectors across the UK economy, including technology and telecommunications, is currently working to mitigate a cyber attack.

While it is not clear if any data was compromised by the incident, cyber security specialists are working on a specific analysis of the systems to determine exactly what happened.

PATCHING ALERT

Google - patching alert

Google has recently updated seven security vulnerabilities, two of which are of the zero-day type.

The tech giant fixed these two vulnerabilities in version 123.0.6312.86/.87 for Windows and Mac and 123.0.6312.86 for Linux users, which will be released worldwide in the coming days.
